

OVERVIEW

I am a skilled front-end developer who has been building things on the web for a number of years. I have extensive experience coding responsive websites with mobile first in mind. I possess a passion for learning new technology and strive for clean, semantic code that makes sense.

EXPERIENCE

Web Developer / Systems Support Analyst

Pearson Embanet

2009-present | Toronto, ON

- Coding and maintaining more than 200 responsive websites using HTML5, CSS3, JavaScript, jQuery, PHP and WordPress
- Collaborating with designers to meet business requirements and build websites based on PhotoShop mock-ups
- Debugging and performing QA for code across multiple browsers, operating systems and mobile platforms
- Supporting LAMP servers on AWS. Tasks include setting up new environments, maintaining version control system (SVN) and deploying websites to production
- Automating everyday server maintenance tasks through Bash scripting
- Monitoring incoming support requests through Jira

Web Developer

The Law Society of Upper Canada

2005-2009 | Toronto, ON

- Worked with clients and content producers to update and maintain public and intranet websites
- Facilitated coding and development to ensure compliance with W3C accessibility standards
- Tested websites on multiple platforms including speech and text browsers

Web Designer

Pet Health Inc

2003-2004 | Oakville, ON

- Designed and maintained over forty websites, including front-end development, and graphic creation and manipulation
- Oversaw search engine optimization and paid placement campaigns
- Produced reports on website traffic and other statistics
- Coordinated and designed three monthly e-Newsletters
