

## OVERVIEW

I am a skilled front-end developer who has been building things on the web for a number of years. I have extensive experience coding responsive websites with mobile first in mind. I possess a passion for learning new technology and strive for clean, semantic code that makes sense.

## EXPERIENCE

### **Pearson Embanet**

#### **Systems Support Analyst**

Toronto, ON | Oct 2015 - present

- Supporting cloud based server infrastructure on AWS. Tasks include setting up new environments, maintaining version control systems and managing website deployments
- Automating everyday server maintenance tasks through Bash and Python scripting
- Working with developers to troubleshoot website issues and customize WordPress installations

### **Web Developer**

Toronto, ON | May 2009 - Oct 2015

- Coding and maintaining more than 200 responsive websites using HTML5, CSS3, JavaScript, jQuery, PHP and WordPress
- Collaborating with designers to meet business requirements and build websites based on PhotoShop mock-ups
- Debugging and performing QA for code across multiple browsers, operating systems and mobile platforms
- Monitoring incoming support requests through Jira

### **The Law Society of Upper Canada**

#### **Web Developer**

Toronto, ON | 2005 - 2009

- Worked with clients and content producers to update and maintain public and intranet websites
- Facilitated coding and development to ensure compliance with W3C accessibility standards
- Tested websites on multiple platforms including speech and text browsers
